Education

Bachelor of Arts in Printmaking

PXL-MAD, Hasselt | June 2025

I'm a printmaking artist based in Belgium. My practice focuses on how time and speed affect the way we look at the world. In a society driven by acceleration and constant change, I explore where I stand as an artist within that rhythm.

I work primarily with screen printing, often combining it with etching, lithography, freehand ink painting and photography. My prints and installations invite a slower gaze, allowing fragments of image and memory to surface over time. For me, it's not about immediate understanding, but about inviting the viewer to experience time.

Skills

- Screen Printing
- Etching
- Photography
- Lithography
- Video Editing
